BERNARDO®

FOREWORD

Since PWA's foundation more than 30 years ago, our principles and ambitions have remained the same: to offer the most extensive range of wood, metal and sheet metal machinery and machine tool accessories at the best possible price – accommodating every customer's individual need.

PWA – a Linz based family company founded in **1979** – started out as a retailer specialising in supplying machinery and engineering equipment throughout Austria. After fourteen years of sustained domestic growth, PWA made a successful switch across into wholesale (**1993**). A significant milestone was achieved when in **1997** when the “BERNARDO” brand was established. Continued growth put considerable strain on our 600 m² Linz warehouse so in **2004** we extended the building to 2000 m². PWA expanded yet again in **2008** by building an additional central storage in Engerwitzdorf with a storage area of 3700 m² (20 km NE of the state capital Linz). Upon completion, we then fully refurbished our original site in Linz converting the old storage area into a 1200 m² showroom that backs on to our head office. In **2014** it was necessary to expand our central storage in Engerwitzdorf (another 3500 m²) because of the positive business development. Today PWA employs 26 staff and supplies 26 countries with an extensive and a continually expanding product portfolio distributed from two sites.

This company profile takes you behind the scenes and outlines PWA's product lines.

ADVANTAGES

MANY REASONS FAVOUR BERNARDO

PROMPT DELIVERY

With great terms in place with multiple carriers we are able to ensure your delivery reaches you on-time and in top condition. Deliveries are made daily and handled by reliable and reputable logistical companies.

EXPERT ADVICE

Our qualified technical staff will ensure you receive the right advice about the most appropriate machine for your application. Furthermore, we offer the customer an opportunity to view most of our product range in our Linz showroom.

OPTIMAL PRICE-TO-PERFORMANCE RATIO

We offer the right product at an attractive price-to-performance ratio for every user's requirement. Long-term business relationships with manufacturers and ongoing price negotiations make it possible for us to keep our attractive pricing.

QUALITY CONTROL

When selecting new products we pay particular attention to quality. We then perform strict internal checks, taking into consideration every individual customer's requirements. Only products that meet the strict BERNARDO quality standard are added to our portfolio.

LONG-TERM EXPERIENCE

With more than three decades of experience in the metal, sheet metal and wood processing industry, we possess a high level of know-how in combination with a reliable service. We owe this competence to long-term business relationships with suppliers and partners.

HIGH RELIABILITY

Customer satisfaction is one of our top priorities and a term we take seriously. BERNARDO products are therefore covered by a 24 month warranty.

SERVICE

Customer service is part of the purchase at PWA. Our separate service division is staffed with experienced and friendly technicians who aim for customer satisfaction. Our wide range of readily available spare parts and parts subject to wear, allows us to meet your needs in a punctual and accurate manner.

EXTENSIVE PRODUCT RANGE

Our large number of machining centres and matching equipment allows us to cover a wide range of applications. With a choice of more than 3,500 articles, we stock suitable machines for amateurs as well as professional users.

COMPANY HEADQUARTERS LINZ

PWAs headquarters in Linz.

Boasting 2000 m² of office space and showroom our Linz headquarters is the first stop for all our customers. Also located in Linz is our extensive spare part storage and repair shop.

LOGISTICS CENTRE ENGERWITZDORF

STORAGE UNIT TESTING CENTRE

In the autumn of 2014 our central storage unit in Engerwitzdorf was expanded up to 7200 m². Capable of storing 5,700 pallets, our large logistics centre allows us to stock approx. 90% of our products, guaranteeing prompt delivery throughout Austria and Europe.

SHOWROOM

Because personal contact and customer support are important to us, we created a 1200 m² showroom presenting the majority of our range. This allows our customers to view all products up close, while getting advice and insight into our machinery. Furthermore, the powering up of machinery to witness its functionality and applications can take place here on request. Competent technical advice and clear explanations of technical issues allow the customer to make a sensible purchase decision.

Our showroom covers a display area of ...

... 1,200 m²!

Personal customer consultation allows a fully informed purchase decision.

TEAM

WE ARE BERNARDO ...

Competence, reliability and flexibility are the three main characteristics that best describe our team.

MARKETING

Our marketing department work continuously on keeping our catalogues, special offers and our website up to date, ensuring consumers are always well informed about products and never miss out on a great deal.

DEVELOPMENT / PURCHASING DEPARTMENT

Selecting new products, which are in demand and meet customers' requirements, is one of the most challenging tasks for our purchasing team. In close cooperation with suppliers we work hard to extend and optimize our portfolio regularly.

SALES

Top priorities include customer service, technical and commercial support and information on order status and delivery times. In addition, all of our selected retailers provide detailed information on all products.

LOGISTICS

Our logistics team works hard to make sure the product reaches you on time and in good condition. We prepare around 100,000 articles per annum for distribution around Europe.

SERVICE

Highly-trained employees are available for technical advice on demand. Spare part orders and repairs are processed in a quick and accurate fashion.

ACCOUNTS

Commercial and general enquiries are promptly dealt with by the accounts department, providing the best possible advice for every individual.

SERVICE

RELIABLE SERVICE COMES STANDARD WITH ALL BERNARDO PURCHASES

One of the main aims of our service team is to deal with customers' enquiries in a quick and competent manner, leaving our customers satisfied at all times.

CUSTOMER SUPPORT

Bernardo staff offer personal support and expert individual advice when dealing with all forms of enquiries. Customer support is available at all times.

SPARE PARTS AND WORN PARTS STORAGE

Our 500m² spare parts and worn parts storage facility enables us to hold large volume allowing the prompt dispatch of spare parts.

ON-SITE SERVICE

To all our customers we offer machine assembly, start-up and training. Furthermore, an on-site service is available through one of our expert technicians.

REPAIR WORK

Repairs are dealt with promptly and professionally by qualified service staff.

PRODUCT DEVELOPMENT AND QUALITY CONTROL

Customers initiate new and further development of our portfolio. Specific customer requirements in combination with market research lead directly to our suppliers' product development.

This form of close cooperation with our suppliers allows us to success-fully meet customers' requests. Suppliers are selected carefully to ensure the development of high-quality products. However, safety first with all the quality improvements. That's the reason why our machines have been checked by TÜV AUSTRIA SERVICES GMBH since 2010

Extensive quality control is carried out by experienced technicians, both during and after production reassuring you the customer that you have invested in a reliable product.

Conformity test by TÜV AUSTRIA

Drilling machines checked by TÜV AUSTRIA

QUALITY CONTROL

After PWA receives a product, we set about assessing it using a comprehensive checklist (testing protocols) to ensure continuous quality for the end user. Several test runs later, machines are prepared for distribution. In Europe we take full responsibility for our products to meet EU-standards. All products are delivered complete with detailed operator manuals and CE-compliance checks.

METAL PROCESSING

Our extensive metal processing portfolio caters for all needs; amateurs, semi-professionals and professionals - everyone will find the suitable machine(s), whatever the application.

When selecting machine equipment, we pay special attention to functionality and quality, constantly optimizing these in close cooperation with the supplier.

We offer the following product range:

DRILLING MACHINES
DRILLING AND MILLING MACHINES
MILLING MACHINES
CNC- MILLING MACHINES
LATHES
CYCLE- LATHES
SAWING MACHINES
GRINDING MACHINES

MBS 350 DGA

GB 35 TH

Profi 550 WQV

BSG 2040 M

UWF 90

ACCESSORIES – METAL PROCESSING

Our wide range of tools and accessories allows professional metal processing at the highest level. By supplying you with everything, from machine to suitable equipment, we ensure optimal, hassle-free working.

Our portfolio for metal processing equipment offers the following range:

CLAMPING TOOLS
MEASUREMENT TOOLS
CUTTING TOOLS
SAW BANDS
SANDING BELTS
SAW DISCS
MACHINE ACCESSORIES

3-jaw chuck

Multifix - tool holder system

Mill chuck OZ-set

Tiltable rotary table TSK

Machine vice PHV

Outside micrometer set (4 pieces)

TIN coated end mill set

Coolant device

WOOD PROCESSING

The extensive Bernardo wood-processing portfolio contains suitable machinery for every customer. Long-term experience and careful product selection are essential and allow us to offer the best price-to-performance ratio.

Our wood processing portfolio is divided among the following:

PLANERS
SAWING MACHINES
SPINDLE MOULDERS
COMBINED MACHINES
DRILLING, MULTI-BORING AND MORTISING MACHINES
WOODTURNING LATHES
BAND SAWS
SANDING MACHINES
WIDE BELT SANDING MACHINES
SHARPENERS
DUST EXTRACTORS
FEED UNITS
EDGE BANDING MACHINE
4-SIDE PLANERS AND MOULDERS
PRESSES AND GLUE APPLICATION MACHINES
BRIQUETTE PRESSES
WORKBENCHES

CU 310 F - 2600

ACCESSORIES – WOOD PROCESSING

Whether milling, sanding or planing, we ensure the supply of the right tools and equipment for each application. Ranging from planer knives to milling tools, we offer a wide range of accessories:

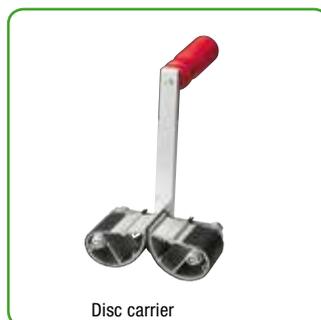

DRILL BITS
PLANER KNIVES
MILLING TOOLS
CIRCULAR SAW BLADES
WOOD TURNING ACCESSORIES
ABRASIVE TOOLS
ACCESSORIES FOR DUST EXTRACTORS
BAND SAW BLADES
SHARPENING TOOLS
ACCESSORIES FOR FEED UNITS
MEASURING TOOLS
CLAMPING TOOLS

Chuck set (6 pieces)

Rebating cutter head

SHEET METAL PROCESSING

Our sheet metal processing machines are produced to a high standard of quality, focusing on technical equipment and operating comfort. The sheet metal processing portfolio ranges from compact handheld devices to hydraulic presses, making it attractive for both amateurs and professionals.

Following product groups are available:

- ARBOR PRESSES**
- TUBE NOTCHERS**
- NOTCHING MACHINES**
- BENDING MACHINES**
- TUBE BENDERS**
- METAL GATHERING AND STRETCHING MACHINES**
- ENGLISH WHEELS**
- BORDERING MACHINES**
- MANUAL SHEARS**
- CIRCULAR CUTTING SHEARS**
- HYDRAULIC IRON WORKERS**
- MOTORIZED GUILLOTINES**
- HYDRAULIC SHEARS**
- PROFILE BENDING MACHINES**

TRANSPORT TECHNOLOGY AND STORAGE FACILITIES

Bernardo's transport technology – pallet trucks, shop cranes and many more – allows for safe transport. We stock suitable devices for a large number of lifting and transport applications, significantly relieving your workload. In addition, our portfolio includes tool and assembly trolleys, making sure necessary tools are always close to hand.

Following transport and storage devices are available:

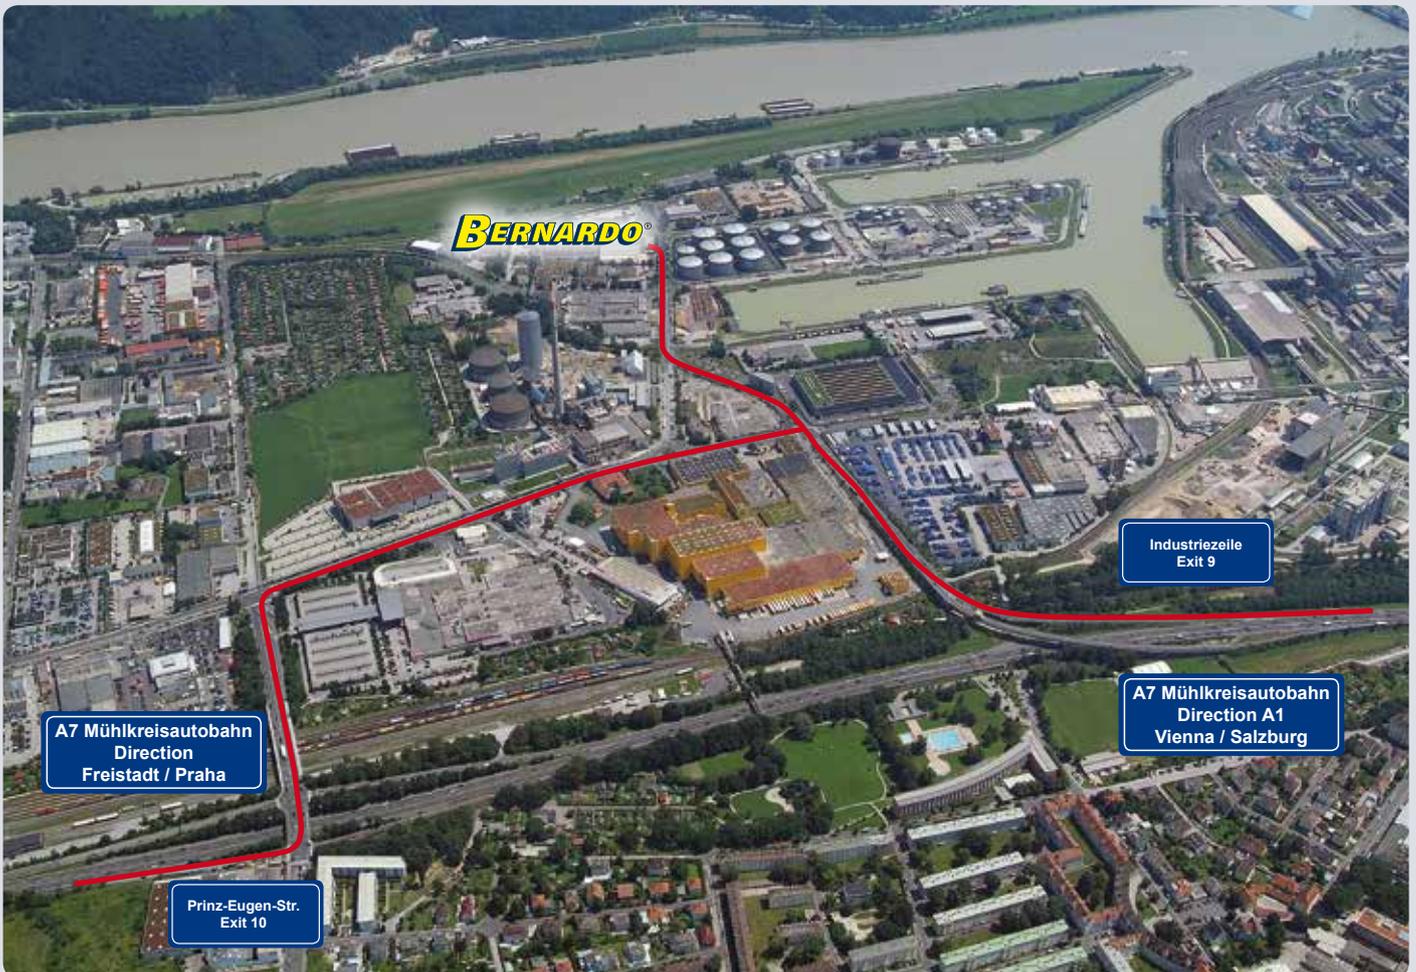

- PALLET JACKS**
- HIGH LIFT PALLET JACKS**
- HYDRAULIC LIFT TROLLEY**
- MANUAL PALLET TRUCKS**
- ROLLER STANDS**
- ROLLER TABLES**
- MACHINERY JACKS**
- HEAVY LOAD TROLLEYS**
- OPEN DECK TROLLEYS**
- HEAVY LOAD ROLLER SKATES**
- ELECTRIC-HYDRAULIC FORKLIFT**
- INDUSTRIAL TRUCKS**
- ELECTRIC PALLET STACKERS**
- TOOL AND ASSEMBLY TROLLEYS**

RA1 / RAA / RAB MRA-S

- For notching of steam pipes, stainless steel, gas pipes, NE- and other pipes of up to 3 mm wall thickness
- For assembly and welding of pipes at the angle of 90°
- Various pipe diameter combined in one machine
- High productivity at a low investment
- Clean edges, no reworking required
- Low force exerted by eccentric shaft (RA1 / RAA / RAB)
- Models RA1, RAA und RAB ideal for wall mounting
- Also suitable for double corner joints
- Model MRA ideal for continuous operation

Example of use

Suitable for the wall mounting

For notching of steam, stainless steel, gas, non-ferrous and other pipes

Weight approx.	19 kg
Art. no.	06-1587

* Material strength 400 N/mm²

Bar and section shears

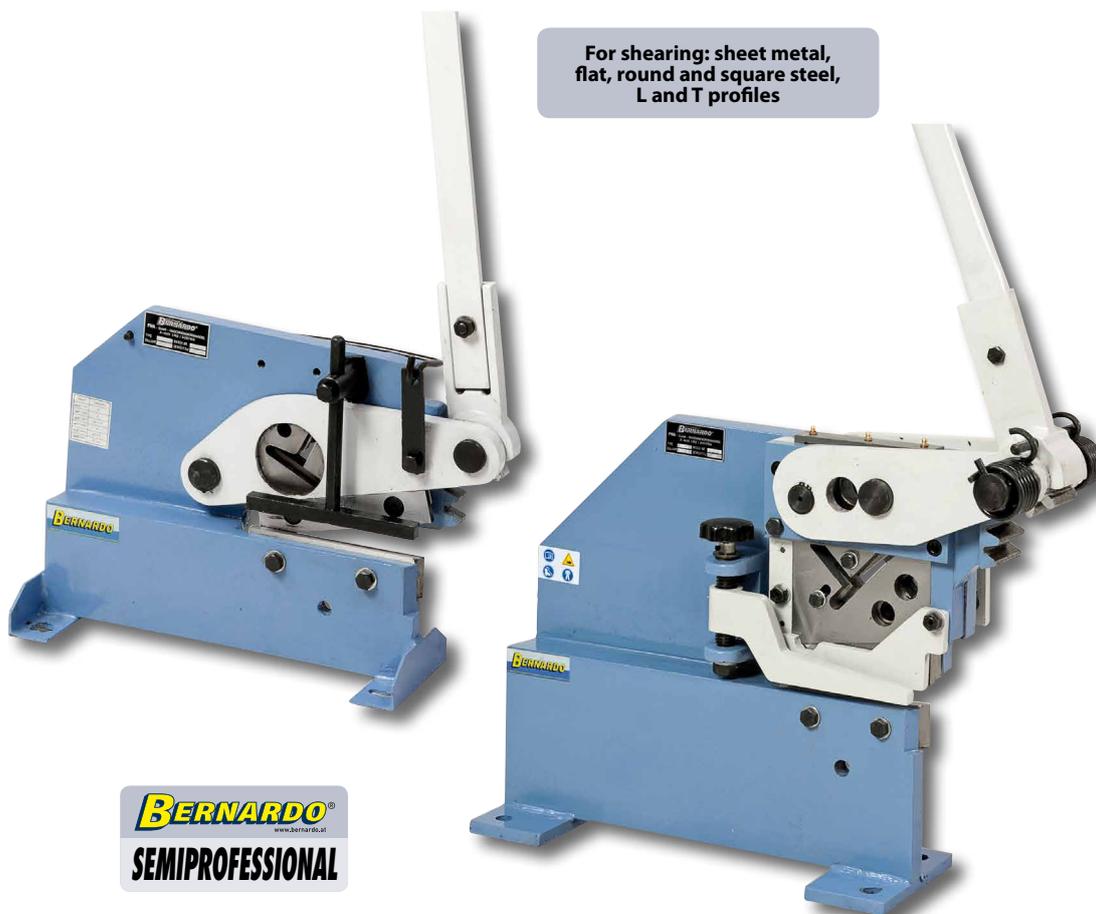

PBS 16 PBS 22

- For shearing of sheet metal, flat, round and square steel, L- und T-Profilen
- Ideal universal scissors for craft and repair operations, but also suitable for schools and training workshops
- Ergonomically favorable machine body made of sturdy steel plates, incl. bores for stationary attachment
- Height adjustable downholder prevents twisting of the sheet during cutting
- Good view of the entire knife length, thus ensuring perfect work
- Knife made of tool steel, hardened and ground
- Power-saving cutting due to the favorable cutting geometry

High-quality cutting tools made of tool steel ensure a clean cut.

For shearing: sheet metal,
flat, round and square steel,
L and T profiles

Example of use
Planishing hammer

Incl. 3 pcs. anvil wheels for the english wheel and 3 pcs. punching dies for the planishing hammer.

BERNARDO
www.bernardo.at
SEMIPROFESSIONAL

For producing convex and
concave sheet metal parts

Optimal
combination device

Technical data

KGR 500

Planishing hammer

Throat	500 mm
Internal height approx.	395 mm
Sheet thickness max. *	2,0 mm
Stroke frequency	1800 - 4600 / min
Max. air pressure	6,2 to 8,2 bar
Air requirement	200 l/min

English wheel

Throat	500 mm
Internal height approx.	395 mm
Sheet thickness max. *	0,75 mm
Aluminium	1,0 mm
Rolling wheel (Ø x width)	114 x 38 mm

Width	1300 mm
Depth	320 mm
Height	1600 mm
Weight approx.	70 kg
Art. no.	06-1117

* Material strength 400 N/mm²

Standard accessories:

- 3 pcs. punching die radius 1" / 2" / 3"
- Polishing hammer
- Foot pedal
- 3 pcs. anvil wheels
- 1 pc. rolling wheel

- For producing convex and concave sheet metal parts such as mudguards, doors, hoods,
- Easily adjustable clamping pressure by handwheel for the perfect radius
- Solid welded steel construction for precise work
- Quick release mechanism on the lower anvil wheel for easy removal of the finished workpiece
- Standard with 6 pcs. anvil wheels for the production of various radii

Example of use

6 pcs. anvil wheels for various radii included.

Practical holder for the anvil wheels on the side of the machine body.

Quick and tool-free change of the anvil wheels, the required wheel is simply inserted into the mounting groove

For producing convex and concave sheet metal parts

Standard accessories:

- 6 pcs. anvil wheels
- 1 pc. rolling wheel
- Quick release mechanism of the lower anvil wheel

Technical data	RSM 560
Throat	565 mm
Internal height approx.	395 mm
Sheet thickness max. *	1,2 mm
Aluminium	1,5 mm
Rolling wheel (Ø x width)	114 x 38 mm
Machine dimension (W x D x H)	940 x 700 x 1360 mm
Weight approx.	60 kg
Art. no.	06-1116

* Material strength 400 N/mm²

Including 6 pcs. anvil wheels

English wheel

RSM 710

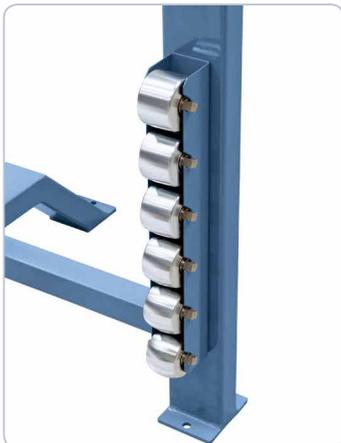

- Quick release mechanism on the lower anvil wheel for easy removal of the finished workpiece
- By handwheel adjustable pressing pressure, thereby a wide variety of radii can be produced
- Ideal for the production of mudguards, doors, hoods, etc. in the restoration of classic cars
- Standard with 6 pcs. anvil wheels for the production of various radii
- Solid welded steel construction for precise work

By quick release mechanism of the lower anvil wheel, a simple removal of the finished workpiece is possible.

Adjustable pressing pressure by handwheel.

Including practical holder for storing the anvil wheels.

For producing convex and concave sheet metal parts

Standard accessories:

- 6 pcs. anvil wheels
- 1 pc. rolling wheel
- Quick release mechanism of the lower anvil wheel

Technical data	RSM 710
Throat	710 mm
Internal height approx.	515 mm
Sheet thickness max. *	1,2 mm
Aluminium	1,5 mm
Rolling wheel (Ø x width)	202 x 51 mm
Machine dimension (W x D x H)	900 x 870 x 1530 mm
Weight approx.	74 kg
Art. no.	06-1114

* Material strength 400 N/mm²

Including 6 pcs. anvil wheels

English wheel

RSM 1040

Planishing hammer
and english wheel

- Ideal for the production of mudguards, doors, hoods, etc. in the restoration of classic cars
- Easy removal of the finished workpiece by quick release mechanism on the lower anvil wheel
- Easily adjustable clamping pressure by handwheel for the perfect radius
- Solid welded steel construction for precise work
- 1080 mm throat to make larger workpieces

Including 5 pcs.
anvil wheels

5 pcs. anvil wheels for various radii included.

BERNARDO
SEMIPROFESSIONAL

Example of use

Standard accessories:

- 5 pcs. anvil wheels
- 1 pc. rolling wheel
- Quick release mechanism of the lower anvil wheel

Technical data

RSM 1040

Throat	1080 mm
Internal height approx.	760 mm
Sheet thickness max. *	1,2 mm
Aluminium	1,5 mm
Rolling wheel (Ø x width)	180 x 75 mm
Machine dimension (W x D x H)	1380 x 750 x 1800 mm
Weight approx.	135 kg
Art. no.	06-1113

* Material strength 400 N/mm²

For producing convex and
concave sheet metal parts

BERNARDO
www.bernardo.at

- Ideal for the production of mudguards, doors, hoods, etc. in the restoration of classic cars
- Easily adjustable clamping pressure by handwheel for the perfect radius
- Precise work through solid machine body made of a steel cast iron construction
- Easy removal of the finished workpiece by quick release mechanism on the lower anvil wheel
- Upper wheel and lower anvil wheel can be rotated 90 °

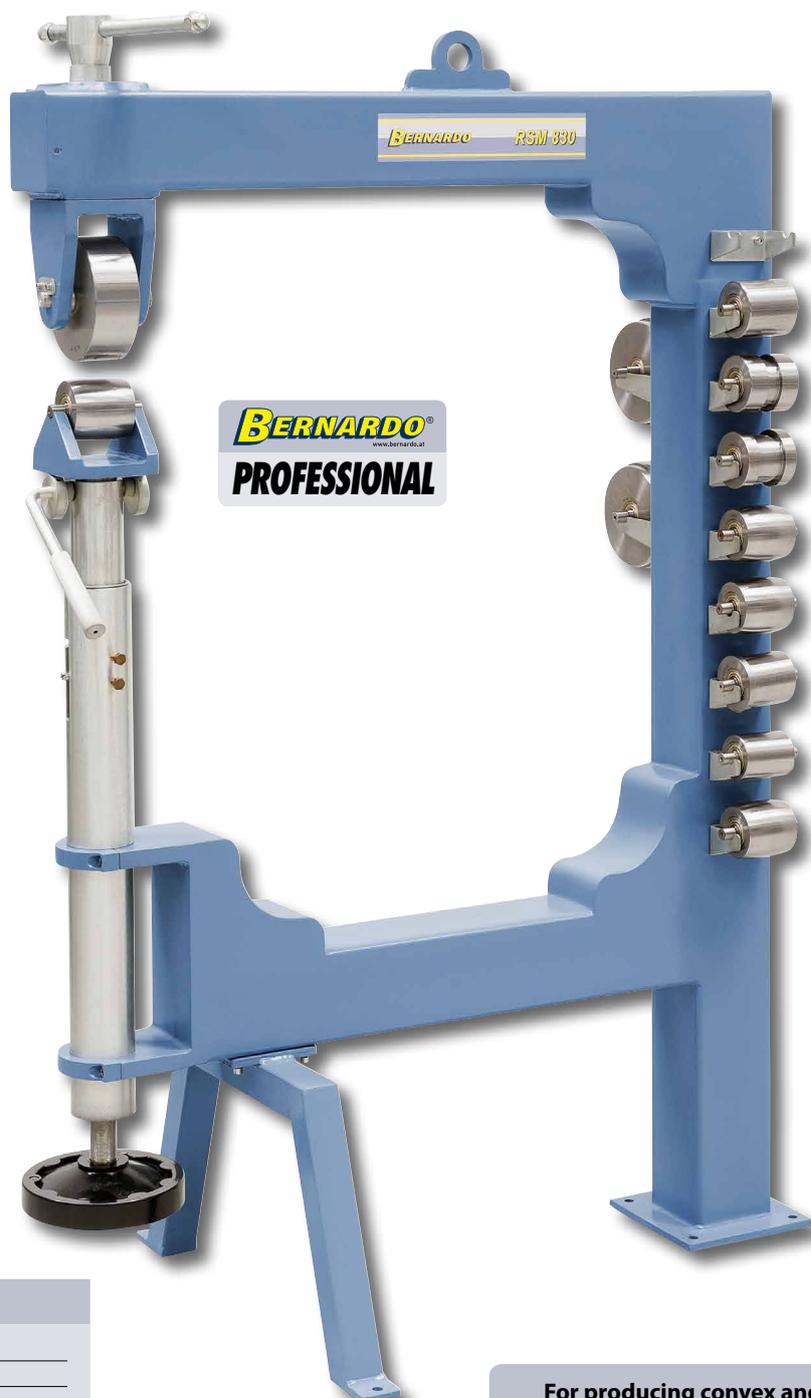

9 pcs. anvil wheels and 3 pcs. roller wheels as standard, practical holder for storing on the stand.

By quick release mechanism of the lower anvil wheel, a simple removal of the finished workpiece is possible.

Upper and lower wheel
can be rotated 90 °

Technical data

RSM 830

Throat	830 mm
Internal height approx.	960 mm
Sheet thickness max. *	1,3 mm
Aluminium	1,7 mm
Rolling wheel (Ø x width)	152 x 57 mm
Machine dimension (W x D x H)	1070 x 680 x 1660 mm
Weight approx.	169 kg
Art. no.	06-1121

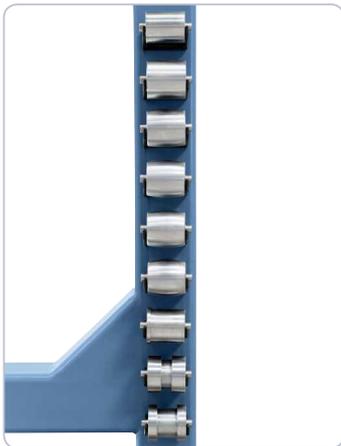

* Material strength 400 N/mm²

Standard accessories:

- 9 pcs. anvil wheels
- 3 pcs. rolling wheel
- Quick release mechanism of the lower anvil wheel

For producing convex and
concave sheet metal parts

- For producing convex and concave sheet metal parts such as mudguards, doors, hoods,
- By handwheel adjustable pressing pressure, thereby a wide variety of radii can be produced
- Quick release mechanism on the lower anvil wheel for easy removal of the finished workpiece
- Extended application area, upper wheel and lower anvil wheel rotatable through 90°
- Solid welded steel construction for precise work

9 pcs. anvil wheels as standard, space-saving storage on the base.

Serially:
1 pc. roller wheel for wheeling
2 pcs. roller wheel for making beads

Upper and lower wheel can be rotated 90°

Easy adjustment of the lower anvil wheel by footwheel.

BERNARDO
PROFESSIONAL

Including 9 pcs. anvil wheels

Technical data

RSM 960

Throat	865 mm
Internal height approx.	955 mm
Sheet thickness max. *	1,3 mm
Aluminium	1,7 mm
Rolling wheel (Ø x width)	152 x 52 mm
Machine dimension (W x D x H)	1250 x 650 x 1620 mm
Weight approx.	180 kg
Art. no.	06-1115

* Material strength 400 N/mm²

Standard accessories:

- 9 pcs. anvil wheels
- 3 pcs. rolling wheel
- Quick release mechanism of the lower anvil wheel

Bordering machines

SM 180 S SM 470

- Easy and quick assembly on workbenches using rotatable base (SM 180 S)
- Stable cast iron construction in modern design (SM 180 S)
- Adjustable fence on the lower shaft (SM 180 S)
- Large throat for attaching deep-seated beads (SM 470)
- For manufacturing of stiffening and connecting beads
- Precise bearing of the shafts
- Including beading and bordering rolls

Standard rolls SM 180 S

Standard accessories:

- 6 pair beading and bordering rolls
- Material fence (SM 180 S)
- Roll wrench
- Stand (SM 470)

Technical data	SM 180 S	SM 470
Sheet thickness*	0,8 mm	0,8 mm
Distance middle of the roll	50 mm	50 mm
Working depth	200 mm (170 mm**)	470 mm
Length	510 mm	760 mm
Width	900 mm	400 mm
Height	550 mm	1080 mm
Weight approx.	19 kg	35 kg
Art. no.	06-1075B	06-1087

* Material strength 400 N/mm²

** with fence

Standard rolls SM 470

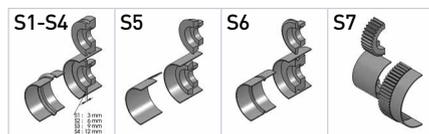

Bordering machines

SM 200 SM 250 C

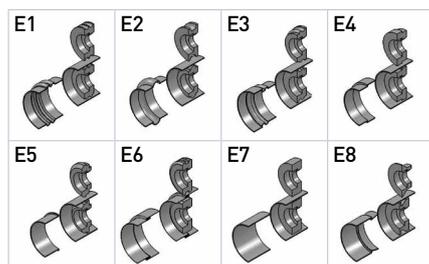

- For producing of different bead types
- Precise bearing of the shafts
- Stable cast iron construction in modern design
- Expanded range of use through 8 different, optionally available roller pairs
- Including beading and bordering rolls
- Adjustable fence on the lower shaft
- Upper shaft adjustable

Standard rolls SM 200

Optional rolls SM 200

Standard accessories:

- 7 pair beading and bordering rolls (SM 200)
- 4 pair beading and bordering rolls (SM 250 C)
- Material fence
- Roll wrench

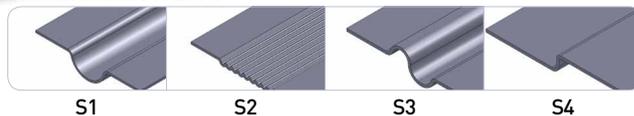

Technical data	SM 200	SM 250 C
Sheet thickness*	0,8 mm	1,2 mm
Distance middle of the roll	52 mm	62 mm
Working depth	200 mm (110 mm**)	270 mm (145 mm**)
Length	560 mm	600 mm
Width	200 mm	280 mm
Height	400 mm	500 mm
Weight approx.	45 kg	50 kg
Art. no.	06-1080	06-1084

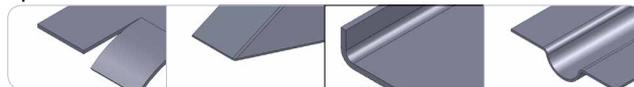

* Material strength 400 N/mm²

** with fence

Standard rolls SM 250 C

Optional rolls SM 250 C

Motorized bordering machine

MSM 250 C

- 4 pair beading and bordering rolls included
- Robust beading machine with motor-driven rollers
- Lower shaft with adjustable fence
- For the economic producing of different bead types
- High accuracy due to precision bedded shafts
- Clearly arranged control elements
- Stand equipped with storage shelf
- Powerful drive motor, even under continuous load
- Mobile foot switch for right and left rotation

Example of use:
connecting beads

Example of use:
stiffening bead

Standard accessories:

- 4 pair beading and bordering rolls
- Foot pedal with emergency stop
- Material fence
- Roll wrench

Technical data

MSM 250 C

Sheet thickness*	1,2 mm
Distance middle of the roll	62 mm
Working depth	250 mm (140 mm**)
Shaft diameter	26 mm
Speed	32 rpm
Motor power	0,75 kW / 400 V
Depth	860 mm
Width	450 mm
Height	1350 mm
Weight approx.	125 kg
Art. no.	06-1089A

* Material strength 400 N/mm²

Motorized bordering machine

MSM 300 C

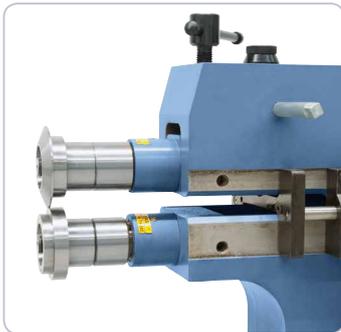

- Expanded range of use through 8 different, optionally available roller pairs
- Upper roll with quick adjustment and stable clamping
- Axially movable stop plate for high repeatability
- Operation via foot pedal, thus both hands free to hold the workpiece
- Powerful drive motor for processing of sheets up to 1,6 mm sheet steel
- High accuracy due to precision bedded shafts
- For the economic producing of different bead types

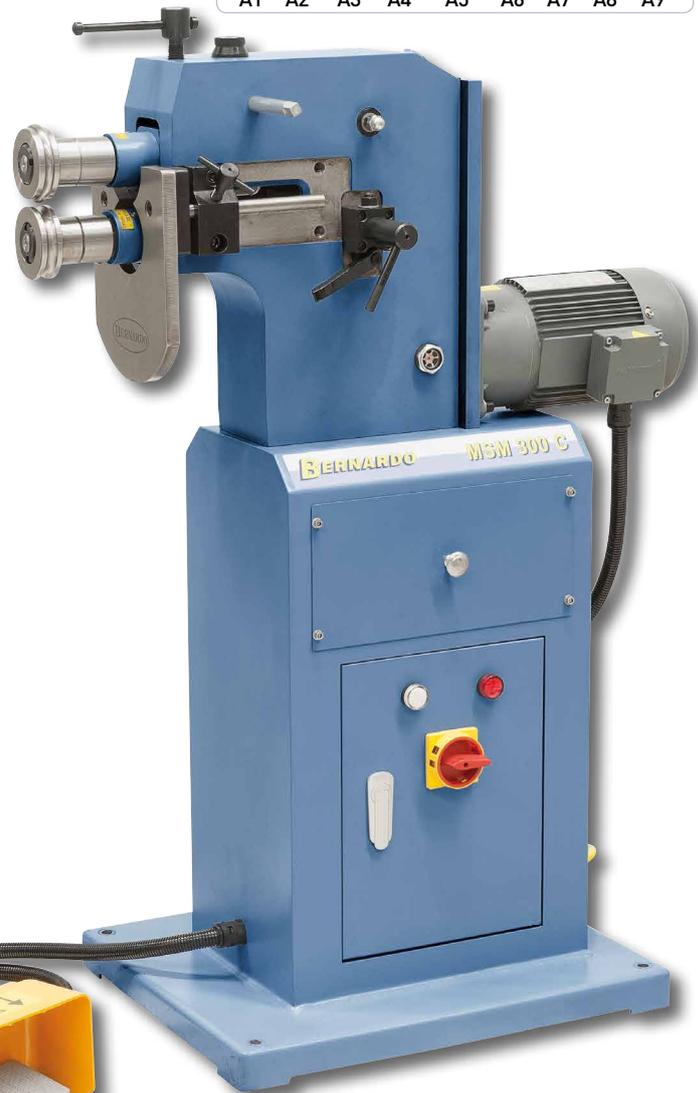

Serial with special rolls Typ A2

Adjustable fence for precise work and high repeatability

Shafts made of special steel, upper shaft adjustable

Standard accessories:

- Special rolls Typ A2
- Foot pedal
- Material fence
- Roll wrench

Technical data

MSM 300 C

Sheet thickness*	1,6 mm
Aluminium	2,0 mm
Distance middle of the roll	80 mm
Working depth	290 mm**
Shaft diameter	30 mm

Manual round bending machine **RBM 25** Mot. round bending machine **RBM 25 M**

- Suitable for bending pipes and profile materials made of steel, aluminum, brass,.....
- Model RBM 25 is driven manually, a reduction gear supports the bending process
- Including standard rolls for bending square materials
- The upper roll is adjusted via an easily visible mm scale
- Standard with foot pedal to control right and left rotation (RBM 25 M)
- Can be used both horizontally and vertically (RBM 25 M)
- Bending rolls hardened and ground

Bending capacity
see on page 70

The powerful drive motor and the high-quality gearbox ensure optimum power transmission (RBM 25 M).

The adjustment of the upper roll is read via a mm-scale.

Technical data	RBM 25	RBM 25 M
Shaft diameter	30 mm	30 mm
Upper roll	98 mm	98 mm
Lower rolls	118 mm	118 mm
Bending speed	-	2,5 m/min
Width	560 mm	635 mm
Depth	450 mm	645 mm
Height	1400 mm	1380 mm
Motor power	-	1,1 kW / 400 V
Weight approx.	165 kg	230 kg
Art. no.	06-1189	06-1188

Standard accessories:

- Standard roll set
- Lateral guide rolls
- Foot pedal with emergency stop (RBM 25 M)

Optional accessories:

	Art. no.	excl. VAT

Motorized round bending machine

RBM 30

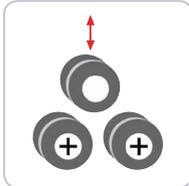

Round bending machine

- Including 6 pairs of rolls, allowing you to work on a wide variety of profiles
- Lower rolls driven by a motor, the upper roll is mechanically fed
- Hardened and ground shafts made of special steel
- Easy-to-read mm-scale for fast reading of top roll setting
- Foot pedal for right-left rotation and integrated emergency stop included in delivery

BERNARDO
www.bernardo.at
SEMIPROFESSIONAL

Guiding of the upper roll by precision ground guide rails.

Clearly arranged controls elements on the front.

Ideal for bending profiles and pipes

Standard accessories:

- 6 pair set of rolls
- Lateral guide rolls
- Foot pedal with emergency stop

Technical data

RBM 30

Pipe round*	Ø 20 x 1 mm (500 mm**)
	Ø 30 x 1 mm (800 mm**)
Solid material round*	Ø 16 mm (400 mm**)
Square pipe*	20 x 20 x 1 mm (800 mm**)

Motorized round bending machine

BPK 55 H

Round bending machine

- Machine in stable welded steel construction for vibration-free working
- 3 motor-driven rolls ensure precise bending
- Standard with hydraulic upper roll feed
- All control elements on the mobile control panel
- Manually adjustable lateral guiding rolls
- Extended range of application due to the horizontal and vertical application possibilities
- Induction hardened and ground shafts and rolls made of special steel

Fast and easy infeed of the upper roll by means of hydraulics.

Standard roll set suitable for bending a wide variety of profiles.

BERNARDO
www.bernardo.at
PROFESSIONAL

Bending capacity see on page 71

Standard accessories:

- Standard roll set
- Lateral guide rolls
- Control panel
- Hydraulic infeed of the upper roll

Technical data	BPK 55 H
Shaft diameter	50 / 40 mm
Upper roll diameter	162 mm
Lower roll diameter	152 mm
Bending speed	3,3 m/min
Motor power	1,5 kW / 400 V
Depth	680 mm
Width	950 mm
Height	1450 mm
Weight approx.	500 kg
Art. no.	06-1210

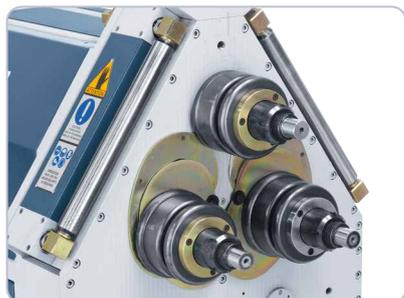

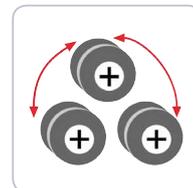

Optional accessories:

	Art. no.	excl. VAT
Set of rolls (synthetic) POM 0 - 60,3 mm, price per dimension **	06-6530	€

Set of rolls (steel) 0 - 20 mm, price per dimension **	06-6534	€
Set of rolls (steel) 21 - 60,3 mm, price per dimension **	06-6535	€
Digital readout ** (only in connection with machine) **	06-6022	€
Special rolls f. angle iron **	06-6023	€
2-speed motor **	06-6024	€

Hydraulic round bending machine

BPK 60 H BPK 80 H

- Independent operation of the lower rolls, adjustment is hydraulic
- Operation via a mobile control panel with foot pedal
- The position of the lower rolls can be adjusted by digital display
- Drive take place by a hydraulic motor and gearbox
- Precise work through solid machine body made of a steel cast iron construction
- Induction hardened and ground shafts and rolls made of special steel
- Application both horizontally and vertically possible
- Electronic protection against overload

Bending capacity
see on page 71

Equipped as standard with manually adjustable guiding rolls.

Including digital display for adjusting the lower rolls.

Technical data	BPK 60 H	BPK 80 H
Shaft diameter	60 mm	80 mm
Upper / lower roll diameter	177 mm	245 mm
Bending speed	6,4 m/min	4,2 m/min
Motor power	4,0 kW	5,5 kW
Voltage	400 V	400 V
Depth	940 mm	1040 mm
Width	1260 mm	1375 mm
Height	1390 mm	1540 mm
Weight approx.	1080 kg	1600 kg
Art. no.	06-1217XL	06-1218XL

Standard accessories:

- Standard roll set
- Lateral guide rolls
- Foot pedal with emergency stop
- Hydraulic adjustment of the lower rolls
- Digital readout for the lower rolls

Manual notching machine

AK 80 F

- Compact notching machine, serially with stand
- Power is transmitted to the workpiece by foot pedal
- For notching up to max. 80 x 80 mm, cutting angle 90°
- Durable precision by re-adjustable guides
- Notch with burr-free cut, without deformation of the cutting edges
- For rational working, standard with adjustable stops
- Cuttings blade made of surface hardened tool steel

Easy adjustment of the cutting gap.

For rational working, standard with adjustable stops.

Cutting angle 90°

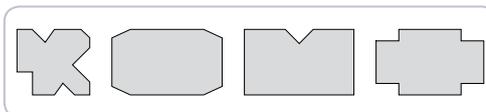

Standard accessories:

- 1 set cutting knives
- 2 material fence
- Protective cover
- Foot pedal
- Stand

Technical data

AK 80 F

Sheet thickness max. (400 N / mm ²)	1,5 mm
Max. cutting length at 90°	80 x 80 mm
Cutting angle	90°
Stroke	30 mm

Pneumatic notching machine

AK 130 P

- Notch with burr-free cut, without deformation of the cutting edges
- Machine body made of high quality cast iron, base made of sheet steel
- Cuttings blade made of surface hardened tool steel
- Effort-saving work by pneumatic drive
- Operation by foot pedal, therefore both hands free for the workpiece
- Large-sized working table with integrated scales
- T-slots for exact guidance of the tiltable stops
- Protective cover in front of the cutting knives for high safety

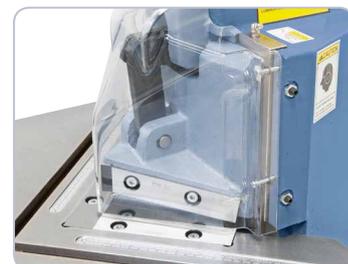

Precision cutting blades made of surface-hardened steel.

Serially with tiltable stops.

High-quality pneumatic components for trouble-free working.

Protective cover out of Plexiglas, therefore optimal view to the cutting edge

Hydraulic notching machine

HA 200 x 4

- Cuttings blade made of surface hardened tool steel
- Fixed cutting angle of 90°, cutting length max. 200 mm
- Operation by foot pedal, therefore both hands free for the workpiece
- Exact cutting results by cutting knives with negative angle
- Standard with foot pedal and emergency stop button
- Large sized work table with T-slots
- Easy adjustment of the stops by scales
- For notching mild steel up to 4 mm, stainless steel (option) up to 2 mm thickness
- Protective cover made of Plexiglas, therefore optimal view of the cutting edge

Examples of use

Exact adjustment of the stops by integrated scales in the machine table.

Clearly arranged switching elements directly on the electrical box.

Universal machines 3 in 1 - 200 / 3 in 1 - 305 / 3 in 1 - 760

- Universal machines for round bending, folding and cutting
- Ideally suited to tight spaces for coachbuilders, modellers but also for use on construction sites
- Incl. adjustable backgauge and folding segments
- The segments of the folding machine start at 25 mm
- Various bending possibilities due to removable folding segments
- Automatic workpiece clamping during cutting
- Ground knife bar made of high quality steel
- Optimum price-performance ratio

When cutting, the workpiece is automatically clamped.

The removable inserts result in a high number of bending possibilities.

Example of use

Segmented upper, bottom and bending beam for a large number of bending options.

Standard with goat-foot segments, ideal for bending of e.g. boxes.

The lifting of the upper beam take place via an eccentric.

Technical data

TB 2050 Flex

Working length	2020 mm
Sheet thickness max. (400 N / mm ²)	1,2 mm
Max. opening with segments	45 mm
Max. opening without segments	150 mm
Max. clearance closed	110 mm
Bending angle	0 - 135°
Backgauge	600 mm
Working height	900 mm
Width	2330 mm
Depth	820 mm
Height	1300 mm
Weight approx. ca.	630 kg
Art. no.	06-1403

Standard accessories:

- Segmented upper, lower and bending beam
- Bending segments
Corner segment left / right each 75 mm | 25 | 30 | 35 | 40 | 45 | 50 | 75 | 100 | 2 x 200 | 270 | 2 x 400 mm

Folding machine

TB 2020

- Segmented upper beam for a large number of bending possibilities
- Universal bending machine for plumbers and repair shops
- High upper beam for the production of high folded profiles
- Quick and easy bending process by means of bow handle
- Easy adjustment of the upper beam for efficient work
- Setting of the bending angle by means of scale
- Separately removable segments for bending boxes
- Large opening for machining large workpieces
- Solid construction in modern design

Segmented upper beam

Fast and easy adjustment of the bending angle via an easy-to-read scale.

The high upper beam allows the production of high-edged profiles, hardened and ground segments.

Removable segments for bending of boxes

Precise adjustment of the workpiece by lateral stop.

The pneumatic sheet support system (standard) prevents the bending of thin sheets and therefore ensures an exact cut.

High-quality hydraulic components for trouble-free working.

HST 3200 x 6 / HST 3200 x 8 HST 3200 x 10

Integrated control NC-89 at the tiltable control panel.

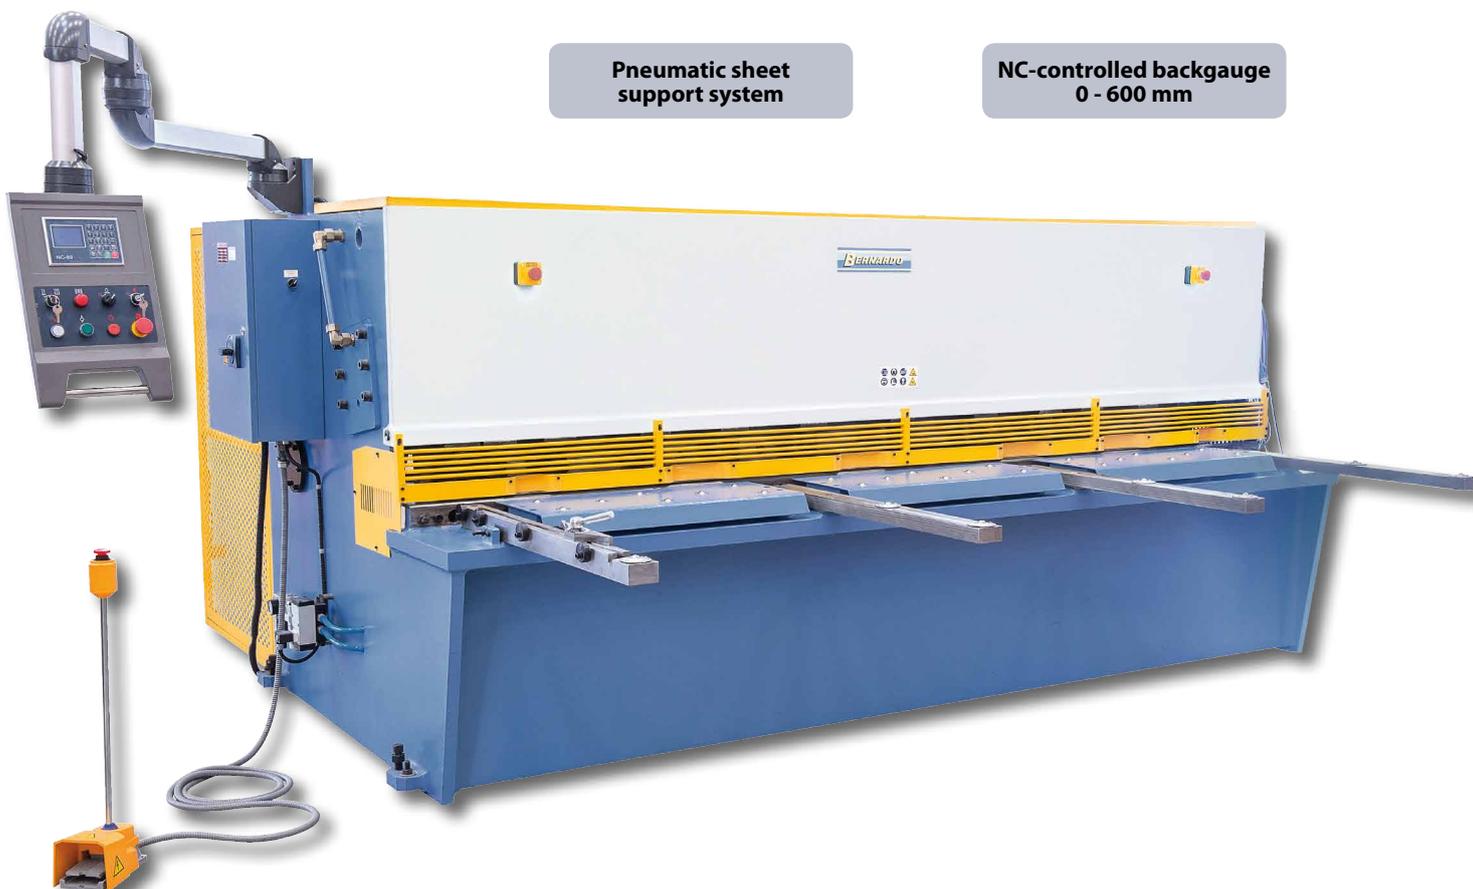

Front sheet supports with integrated rolls for processing large format sheets.

Cutting gap adjustment - quick and easy adjustment to the desired sheet thickness.

**Best
Price**

Pneumatic sheet support system

**NC-controlled backgauge
0 - 600 mm**

Standard accessories:

- Cutting gap adjustment
- Cutting line illumination
- Motorized NC-backgauge
- Front sheet metal support
- Side stop
- Angle stop
- Protective plate with photocells
- Control NC-89
- Pneumatic sheet support system
- Foot pedal with emergency stop
- Knives made of tool steel

Optional accessories:

Set of knives

Art. no. excl. VAT
06-6320 €

Separat foot pedal with integrated emergency stop button.

Hydraulic guillotine shears

HKT 3200 x 8 HKT 3200 x 12

- Linear movement of the knife bar and adjustable cutting angle (0,5° to 2,5°) for optimal cutting results, especially at thin sheets
- Easy adjustment of the cutting gap by handwheel on the front of the machine
- Inspection window out of Plexiglas, therefore optimal view to the cutting edge
- For efficient cutting of various materials, such as sheet steel, brass, aluminum, copper, ...
- Cutting by foot pedal, hands remain free for optimal positioning of the sheet
- High operator safety through protective grid and photocells on the backside of the machine
- Robust welded steel construction for torsion-free working
- Serially with pneumatic sheet support system, ideal for thin sheets
- Stepless adjustable cutting length, time savings on short workpieces

Integrated control NC 10 in the control panel, standard with memory function

Compact and low-maintenance hydraulic unit, easily accessible for maintenance.

Backgauge with ball screw for increased accuracy.

High-quality electric components from e.g. Schneider Electric

Technical data

	HWP 160	HWP 160-1500	HWP 200
Pressure force	160 to	160 to	200 to
Passage between stand	1100 mm	1500 mm	1300 mm
Piston stroke	400 mm	400 mm	400 mm
Piston diameter	125 mm	125 mm	140 mm
Max. pressure	255 bar	255 bar	243 bar
Table width	498 mm	495 mm	525 mm
Max. working height	930 mm	930 mm	930 mm
Forward speed	7,48 mm/sec.	7,48 mm/sec.	5,73 mm/sec.
Working speed	2,4 mm/sec.	2,4 mm/sec.	1,84 mm/sec.
Backward speed	9,35 mm/sec.	9,35 mm/sec.	7,08 mm/sec.
Motor power	3,0 kW	3,0 kW	3,0 kW
Width	1725 mm	2125 mm	1925 mm
Depth	935 mm	935 mm	975 mm
Height	2200 mm	2270 mm	2270 mm
Weight approx.	1195 kg	1430 kg	1690 kg
Art. no.	06-1770XL	06-1775XL	06-1777XL
Price excl. VAT			

Optimal price-performance ratio

Standard accessories:

- Pressure gauge
- Height adjustable work table
- Overload valve
- Moveable cylinder (except HWP 30)

Hydraulic shop presses with moveable cylinder

BRHP-QZ

- Adjustment device for height adjustment of the work table included in delivery
- Ideal for straightening axles, shafts, etc., but also for pressing in and out of bolts, bearings, bushings and much more
- High quality hydraulic presses for industrial use
- Equipped as standard with a pressure gauge for pressure display
- Fast forward and return speeds for efficient work
- Robust welded steel construction for heavy demands
- Piston can be stopped in any position

All switching elements clearly arranged.

Increased safety thanks to two-hand operation and emergency stop switch in the control panel.

Including overload valve

Technical data	BRHP 100 QZ	BRHP 150 QZ	BRHP 200 QZ	BRHP 250 QZ

Hydraulic shop presses with moveable cylinder

BRHP-QZ

Shop presses

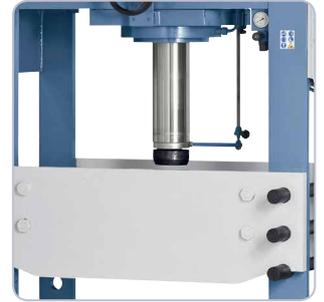

The piston can be moved to the left or right by handwheel.

Robust locking bolts ensure a secure hold of the support table.

Hydraulic system with high quality components.

Large dimensioned piston for highest demands.

Best Price

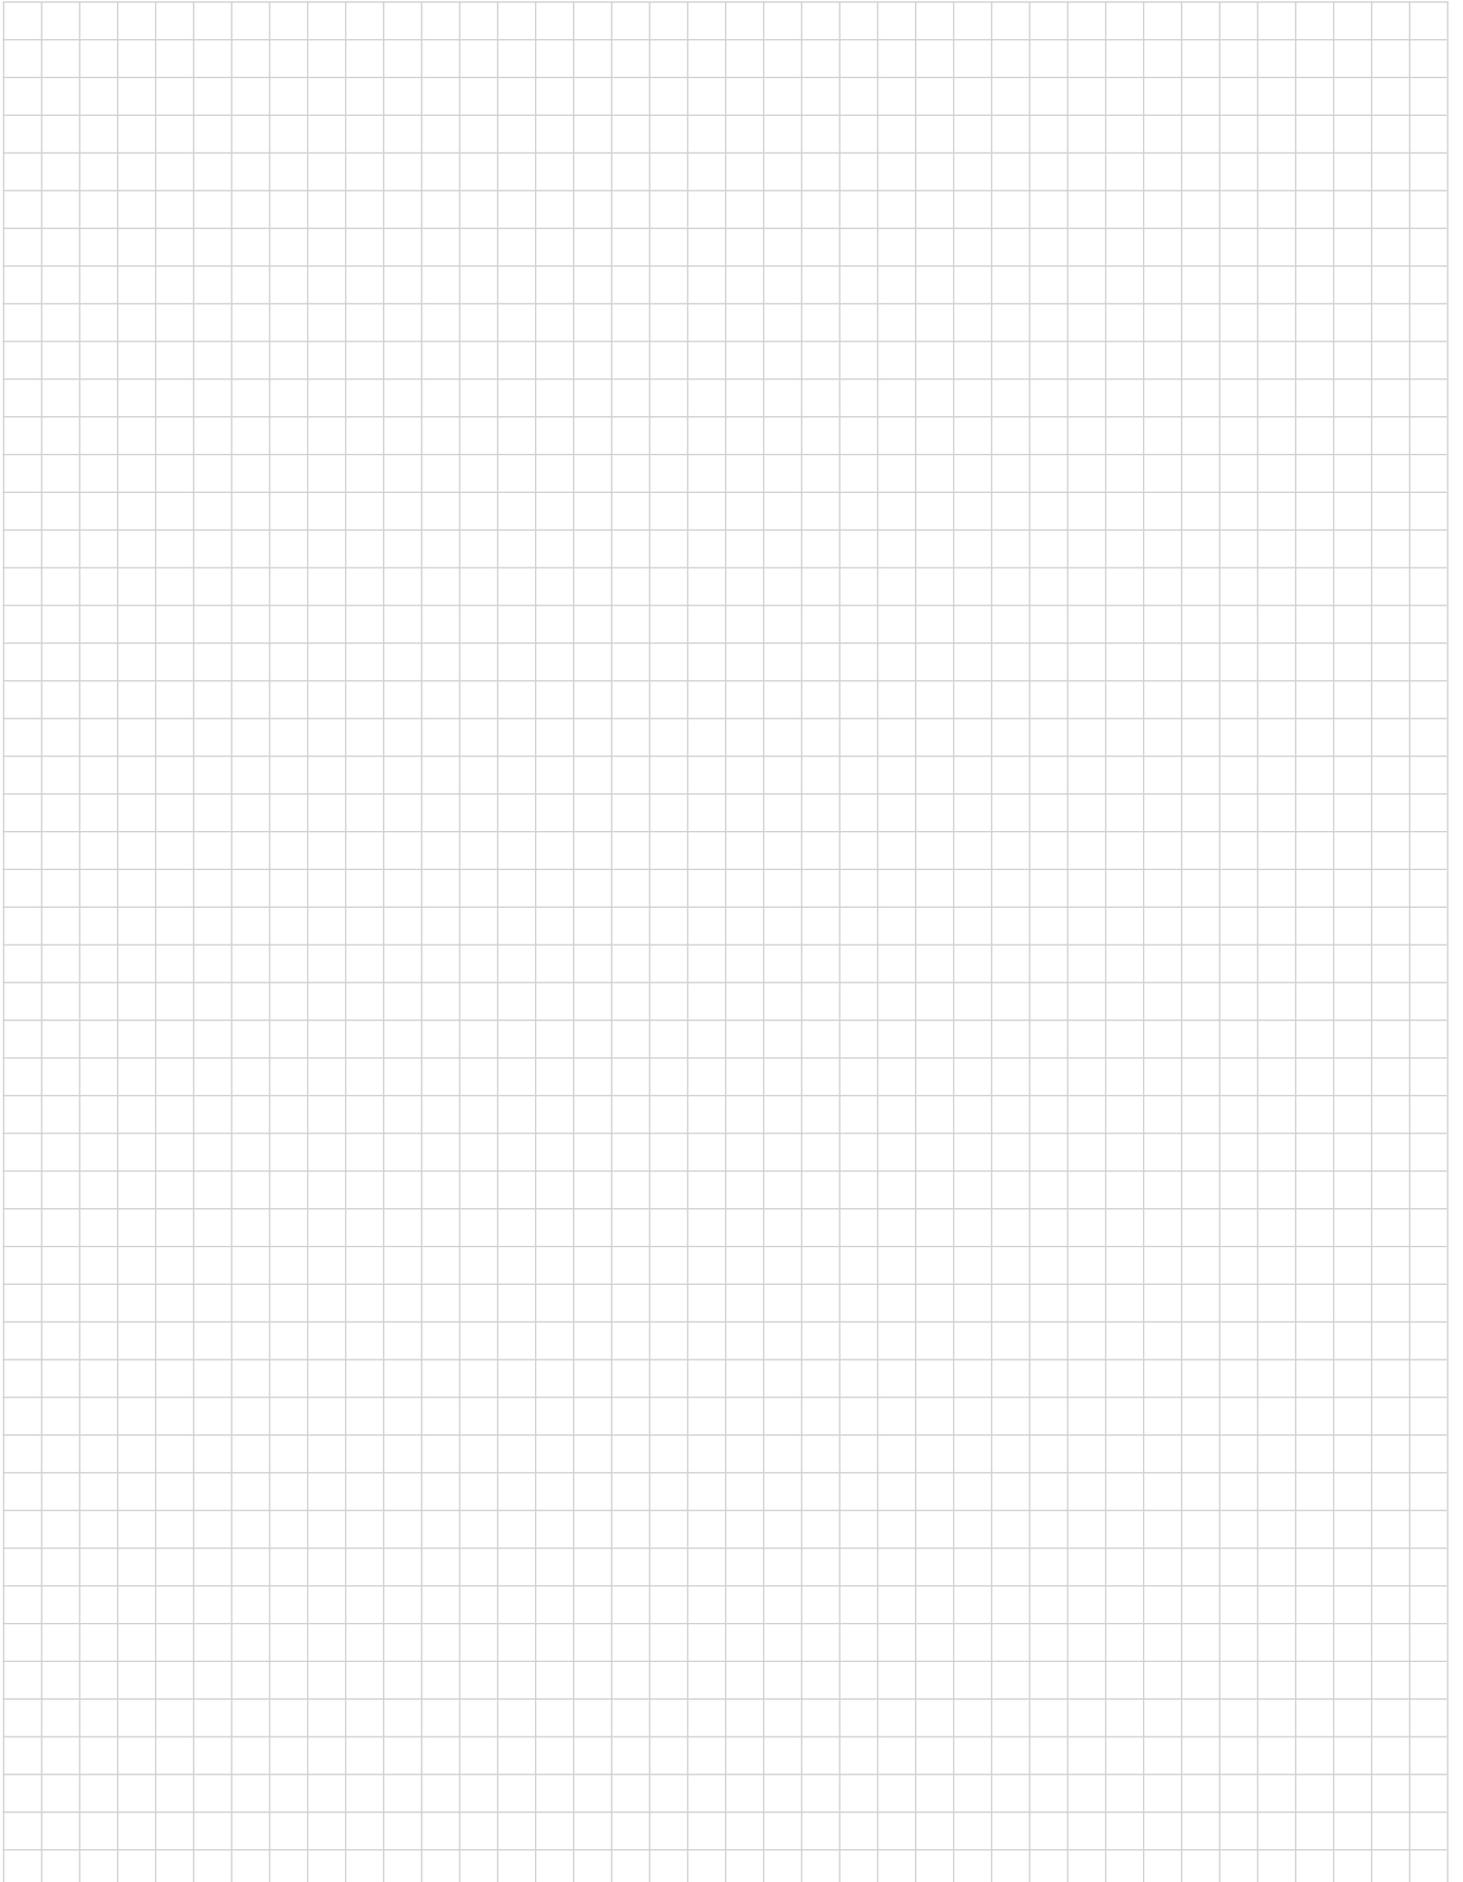

Including prism supports

Standard accessories:

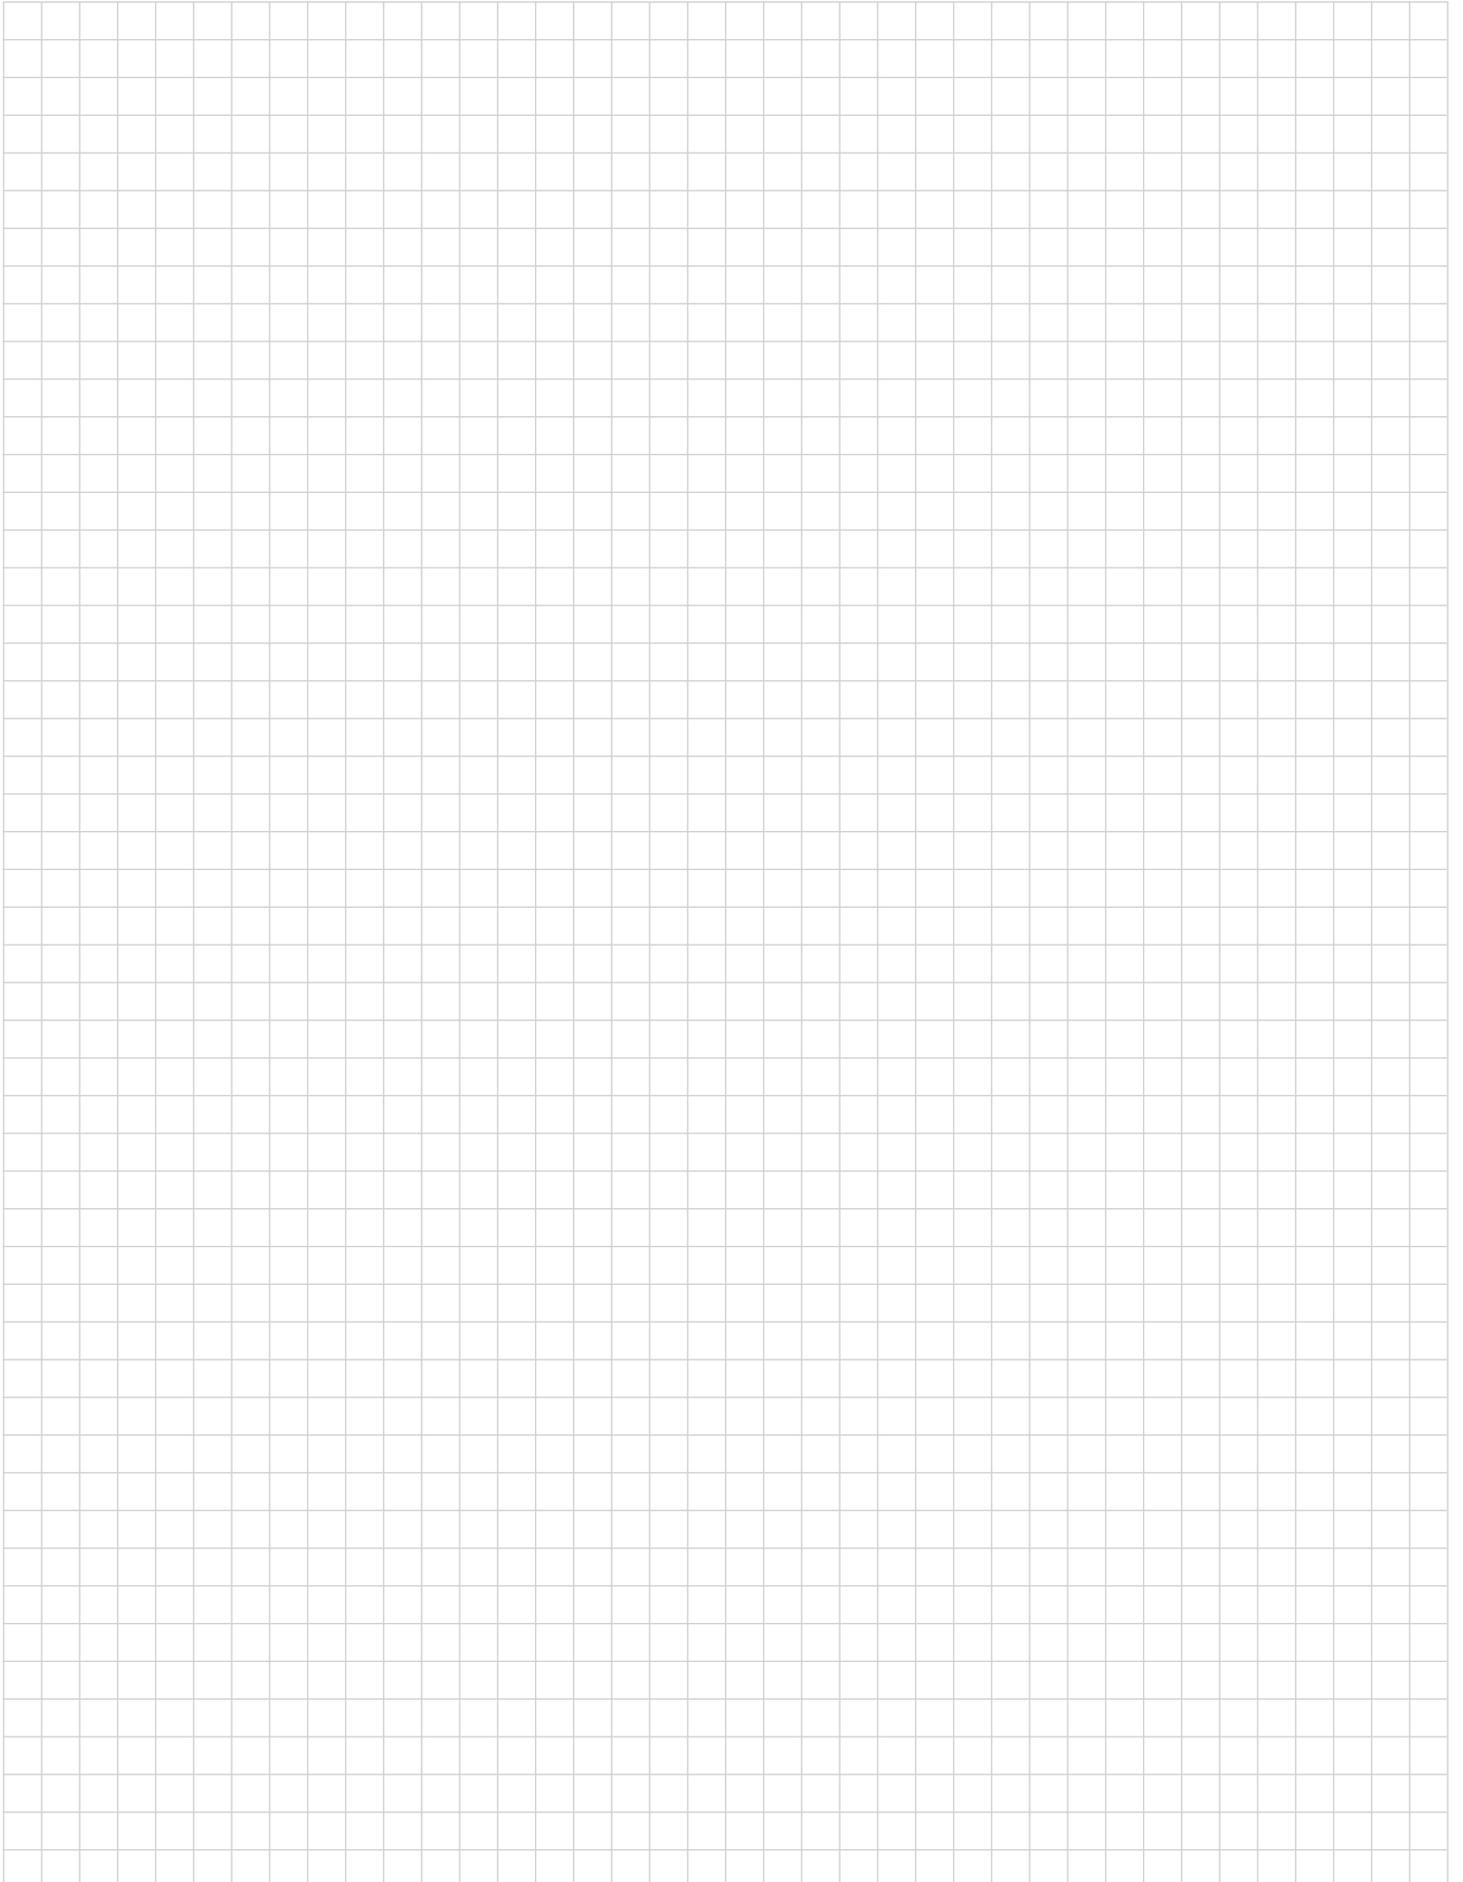

- Pressure gauge
- Height adjustable work table
- Overload valve
- Moveable cylinder
- Prism supports
